Dear Colleagues,

Get excited for PFD Week 2020 - The Virtual Experience! On behalf of the entire Program Committee, we are pleased to virtually welcome you to the 41st Annual Scientific Meeting, coming directly to the comfort of your living room, office, or wherever you choose to log in.

The scientific quality of the meeting is as strong as ever, we appreciate that you choose to submit and present your research at our annual meeting. In addition to the excellent abstracts, we have several speakers and panels focused on topics increasingly relevant to your practice and community, including our two keynote speakers. Khiara Bridges will speak on Racial Disparities, and David Mayer will speak on Creating a Culture of Safety. On Thursday night, join us for the Video Café - we will provide the movies, you bring the popcorn (or your snack of choice).

One of the hallmarks of a typical AUGS meeting is the ability to catch up with friends or have impromptu discussions with colleagues. Although a global pandemic has placed restrictions on our ability to meet in person this year, the Program Committee has planned several events to encourage interaction and discussion. To start each day, we will have an open “lobby” where meeting participants can join a free-flowing discussion on a predetermined topic moderated by subject matter experts. For example, on Wednesday morning we will have a session on pelvic anatomy moderated by Drs. DeLancey, Corton, and Kenton. On Saturday, we will have several concurrent sessions intentionally structured to encourage small group discussions.

We have also set aside time for fun! On Friday evening, we'll come together for the AUGSome Karaoke Challenge, which is back this year. We look forward to hearing and seeing your creativity on display and encourage you to use this time to make your annual donation to the PFD Research Foundation. On Saturday afternoon, we have designated time for you to reconnect and catch up with friends and colleagues as we close out the meeting.

While I will miss the chance to connect in person, I look forward to spending PFD Week 2020 with you!!

MEETING CODE OF CONDUCT

AUGS is committed to providing a safe, professional and productive meeting environment that fosters open dialogue and the exchange of scientific ideas, promotes equal opportunities and treatment of all participants, supports diversity, and is free of harassment and discrimination.

Speakers are expected to demonstrate scientific integrity and professional ethics. AUGS recognizes that professional and well-intentioned scientists and clinicians can and do disagree; PFD Week is intended to serve as a forum to consider and debate science-relevant viewpoints in an orderly, respectful, and fair manner. All participants are expected to treat others with respect and consideration and alert staff of any dangerous situations or anyone in distress. This statement applies to all attendees, speakers, exhibitors, staff, contractors, volunteers, and guests at the Annual Meeting and related events.

AUGS will not tolerate any form of harassment, sexual or otherwise. Harassment includes speech or behavior that is not welcome or is personally offensive, whether it is based on ethnicity, gender, religion, age, body size, disability, veteran status, marital status, sexual orientation, gender identity, or any other reason not related to scientific merit. It includes stalking and unwelcome attention. Behavior that is acceptable to one person may not be acceptable to another, so use discretion to be sure that respect is communicated. Harassment intended in a joking manner still constitutes unacceptable behavior. Retaliation for reporting harassment is also a violation of the Code of Conduct, as is reporting an incident in bad faith. Harassment should be reported immediately to an AUGS staff member through the virtual meeting platform or at info@aug.org or 301-273-0570.
